

ENHANCING STABILIZING SEALER

FEATURES AND BENEFITS

Breathable – Will not trap efflorescence and whiten

Dual-purpose – Sealer and joint sand stabilizer

Durable surface seal – Increased protection and stain resistance

Eco-friendly – Solvent free, will not kill plants or damage building materials

BP Pro Enhancing Stabilizing Sealer is designed specifically for use on block paving to stabilize joint sand and seal the paver surface. It is a water-based single component polymer that penetrates into the pores and seals the surface with a coating that gives you a semi-gloss finish. Enhancing Stabilizing Sealer is a green product that is solvent free and environmentally friendly. It is VOC, EPA, OSHA and FDA compliant. It is non-hazardous and non-toxic and has the consistency of water and a milky white appearance with a slight odor when in it's liquid state and dries to clear semi-gloss finish. It can be used indoors and outdoors on new and existing projects because it is safe and UV stable. Enhancing Stabilizing Sealer can be applied immediately after pavement completion because it will not trap efflorescence and whiten and it has good coverage. The product is easy to install and offers increased stain protection and reduces the formation of efflorescence. Cured product is heat and freeze resistant.
