

# NATURAL STABILIZING SEALER

## FEATURES AND BENEFITS

**Breathable** – Will not trap efflorescence and whiten

**Dual-purpose** – Sealer and joint sand stabilizer

**Durable chemical sand bond** – Reduces weeds and insects

**Eco-friendly** – Solvent free, will not kill plants or damage building materials

BP Pro Joint Stabilizing Sealer is designed specifically for use on block paving to stabilize joint sand and seal the paver surface. It is a water-based single component polymer that penetrates into the pores and seals the surface with a coating that gives you a natural looking satin sheen. Joint Stabilizing Sealer is a green product that is solvent free and environmentally friendly. It is VOC, EPA, OSHA and FDA compliant. It is non-hazardous and non-toxic and has the consistency of water. It is milky white with a slight odor when in its liquid state and dries clear. It can be used indoors and outdoors because it is safe and UV stable, on both new and existing projects. Joint Stabilizing Sealer can be applied immediately after pavement completion because it will not trap efflorescence and whiten. The product is easy to install and offers increased stain protection and protection from the elements. Cured product is heat and freeze resistant.
