

# WETLOOK STABILIZING SEALER

## FEATURES AND BENEFITS

**Breathable** – Will not trap efflorescence or moisture and whiten

**Stain protection** – Easy-to-clean barrier

**Preserves pavement** – Shields against the environment

**Durable** – Long lasting darkened wet look

BP Pro WetLook is designed specifically for use on block paving to seal the paver surface and bond the joint sand. It is a solvent-based single component polymer that enhances your surface with a darkened wet look with a flat finish. WetLook is VOC compliant. It has the consistency of water and is clear in appearance with a strong odor when in it's liquid state and dries to a semi-gloss finish enhanced finish. It can be used indoors and outdoors on new and existing projects. WetLook can be applied immediately because it is breathable and has good coverage. The product is easy to install and offers stain and environment protection and reduces the formation of efflorescence. Cured product is heat and freeze resistant.
